

FOIAb3b

DD/I Wartime Mission - [REDACTED]

National intelligence, current, post-war, etc., support.

OCR the heartbeat of the mission - produce the info necessary.

Intel process here ^(by) must be devoted to:

1) national intel, 2) departmental, 3) current

Field - asst chief of staff ^{for intelligence} in field will be

DD/I. Under him, carbon copy of research & support functions here, & op. in J 2 structure

DD/I ill-prepared for it in some theaters. Middle East, Europe

Don't know who to be required in field, & for what specific subjects yet.

Thinking rather than plans desired by the DD/I

Assumptions of war types:

- 1) Complete bomb - D+30 days
- 2) Nuclear exchange to conventional D+6 mos.
- 3) Korea type deteriorating into nuclear - D+1 yr
- 4) totally conventional - D+?

All field DP/1 people under CIA field commander, which is DD/P.

will be direct communications link, however (FBID) - Substantive support from DP/1 Washington less control than ~~same as~~ ^{at present} (DP/P the housekeeper).

Estimate
CIA advises NSC in wartime; Dulles says will lean on IAC just as in peacetime.

Current intel.

+ Ec, geog, & scientific.

Coordination

FOIAb3b

IAC in Wartime - [REDACTED]

Relocation sites: [REDACTED]

25X8A

FOIAb3b

[REDACTED] recommendation of a deputy IAC - in residence at CIA site to make Nat. Estimates. Coolly received by IAC members - though don't overside staff work on estimates presently, & hard for the group to meet in wartime, want still to pass on estimates at highest level.

Two questions:

How does IAC function in wartime?

How does IAC get interested in more than substantive matters?

Thinking on junior IAC in field also
(no AEC & FBI). in DCID's

Emphasis on advisory function - Director of CI still responsible for central intelligence. But still programmed to allow ^{& publicize} dissent, despite legal status as advisory body.

Killian Committee recommendations: #1 - duplication,

#2 resolution of intel issues in field; #3 - Coord.

war gaming.

 IAC

Military sees too parochial in collection performance - State Dept better performer. Thus scientific attaches now getting setup under State, over some Air Force resistance.

Development is that sees getting pushed into position of also being in business of common ^{"inter-departmental intelligence"} concern - no more of doing things out of goodness of hearts.  job, backed by Dulles, with new stature & prestige brought on by Killian Committee - the "more positive coordination role".

FOIAb3b

FOIAb3b

Agency Global War Plan - [REDACTED]

Theater plans geared to it, in greater detail & specifics.

Assumptions - global war (in line with JCS plans).

General - purpose, assumptions

Concept of CIA wartime organization
mission & concept of operations

Tasks

Support

Command & Communications

Implementation - Annexes & appendices
to Plan. A Basic

B Wre support

C Nat war

D O'seas org

E hq org

Admin & support

F Exec

G Comms

H Areas (Mil, State, & DDP, ^{Intelligence})

I TSS

J Recops

Global War Plan

[CS War Plans, ^{which} ~~the~~ Global Plan tied to:

JCS level - Joint Strategic Capabilities Plan
(UW Annex) - revised on yearly basis.

USCINCPAC level - Area CINCPAC War Plan - U/W &
Intelligence Annexes.

CIA level - CIA/CS Theater (Area War Plan - various

Annexes similar to global plan
(worked out w/ Theater commanders).
Regional, or Country, war plans
w/ same format & annexes.

[Have arrived at specific list of ^{claimstake} jobs to
be done for the military on war
outbreak. Seem to be really in gear.
Established assets accordingly & as
requested - 1st, 2nd, & 3rd priority.

FOIAb3b

~~Secret~~
~~(Collection)~~

OO in Wartime -

Contacts Dir (Overt collection)

Expect increase in pinpoint reqts, decrease
of general reqts

Decrease of sources

Check travelers entering & leaving U.S.
More work for T&I & Journal because
of acceleration of tech. devices,
Participate in admin. of tech.
interorgs in U.S.

Each field office has relocation center.

FBID

| Problem is to keep staff overseas - monitors,
| translators, etc. Evacuation works program.
Speed of the essence.

Also note FDD

FOIAb3b

Basic Intelligence in Wartime

Concept is insuring availability of a minimum comprehensive intelligence. The reserve of knowledge that was lacking when WWII began.

Great value not what simply is published, but the organized, comprehensive, evaluated files it has stimulated and keeps in being.

NIS Committee & Mechanism Operates thus in war as prior to war as best tool to achieve & retain this objective.

c) reaction of opponent to certain peace terms; d) post-hostilities world;
 e) misc. estimates & support
Organization no problem, since hardly have one.

Will do best to maintain smallness of size - have to add some military.

Depend on research org's for essential texture and density of material.

Require close & continued association with IAC agencies. Comm's alone seem inadequate.

Terms of Reference may become luxury in waiting situation - reduce to a "scope" statement.

Oral contributions more frequently.

Cut down & make drafts more pointed.

Emphasize word. by substantive people themselves as accelerating tool.

25X1C8e

set-up - substantive people participating in drafting
stage perhaps

FOIAb3b

Technical Intelligence in Wartime

Military well-geared - problem is determining
CIA's proper wartime role.

Push clandestine collection against the highly
important targets & exploitation thereof.

Defense and counter-measures

25X1D0a

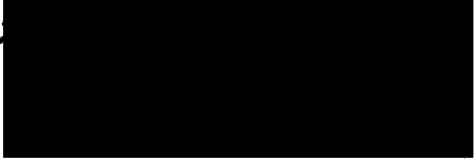

Little activity for Agency in conventional
weapons field - this for Mil. Exec.

Shift in OSI operations in wartime to 75%

focus on tech. rather than prod. scientific
intel.

("Situation")

FOIAb3b

DDI's Maintenance of War Room - 

Not to serve as focal point of day-to-day intelligence; rather, a round-up point.
Reg. NSC + DCI activities remain President's focal point, per se.
Really a stand-by operation, since normal briefings carried on in President's office.
Duplicate facility at Emergency White House.

FOIAb3b

Coordination in Wartime - [REDACTED]

Coordinate the policies of coordination - Truscott's job
no substantive - left to other DD's,
Inter-agency coordination mechanisms.

FOIAb3b

CIA Emergency Plan - [REDACTED]

Continuity of government = Relocation Plan
Guidance from ODM, but only broad aspects
applicable.

602 people in CIA Plan (stores for 650).

| Out of date - agency grown, & site more
susceptible to new weapons than previously.

Concept now not a selected 602, but entire
survivorship - such as there is.

Working on augmentation site(s) & enlarging

25X1A6a [REDACTED]

No plan or guidance on families - ingenuity
of family head - own relocation site.

NSC physically part of Relocation site.

ODM's mobilization Plan "C" - for time
short of war but threatening.

Mobilization Plan "D" - for time of
all-out atomic attack.

CIA participates to keep lines clear primarily -
| little applicability (since most
activity overseas) otherwise.

FOIAb3b

Continuation of DD/P - [REDACTED]

DD/P's war planning activity

NSC 10-2 says CIA supports mil. in time of war for clandestine activities

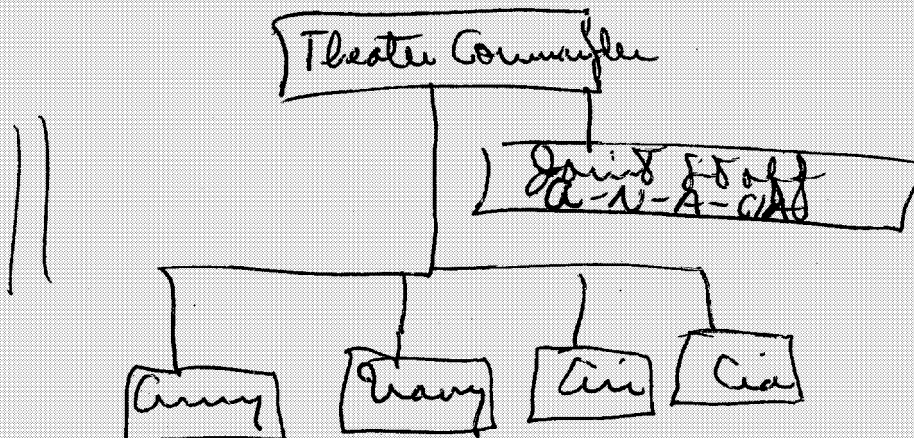

Command relationships Agreement - Dec 52

Guerrillas, E & E, resistance & sabotage -

W/W responsibilities in wartime.

Theater Commander runs 4th Force along w/ other three (now, thru GA Commander).

"Agency Force in a Theater War" (mix on Fourth Force?)

New Command Relationships Agreement
clarifies CIA field commander as
controlling all CIA field forces -
clandestine ops or F/

FOIAb3b

Economic Intelligence in Wartime - [REDACTED]

Sino-Soviet Bloc primarily; but growing experience in peripheral areas.

- ① Greater participation in targeting effort at initiation of hostilities.
- ② Current reporting & current appraisal of strengths & weaknesses.
- ③ Damage assessment.

Current support thru 1) Int estimating structure, 2) Current Intel Center, 3) to DD/I & DCI to NSC for specific questions, 4) thru offices of Secy of Defense.

Current general & assessed info files.

The so-what problem.

Stress on coordination of answers
resolve conflicting interpretations

Agreements with other agencies to
emphasize certain duties & responsibilities

EIC secretariat require considerable, im-
mediate augmentation - agreed

evaluation report

FOIAb3b

Economic Warfare —

Program for reduction of enemy war ~~potential~~.
Concerned with the instrumentality of the
| the program rather than the program
| itself.

- ① War trade agreements - pre-emptive purchasing
- ①② Foreign assets
 - ③ Ships and cargoes
 - ② ^{Interests?} Money movements & trade activities
- ③ Sabotage, etc
- ④ External trade & devel. activities
- ⑤ ?

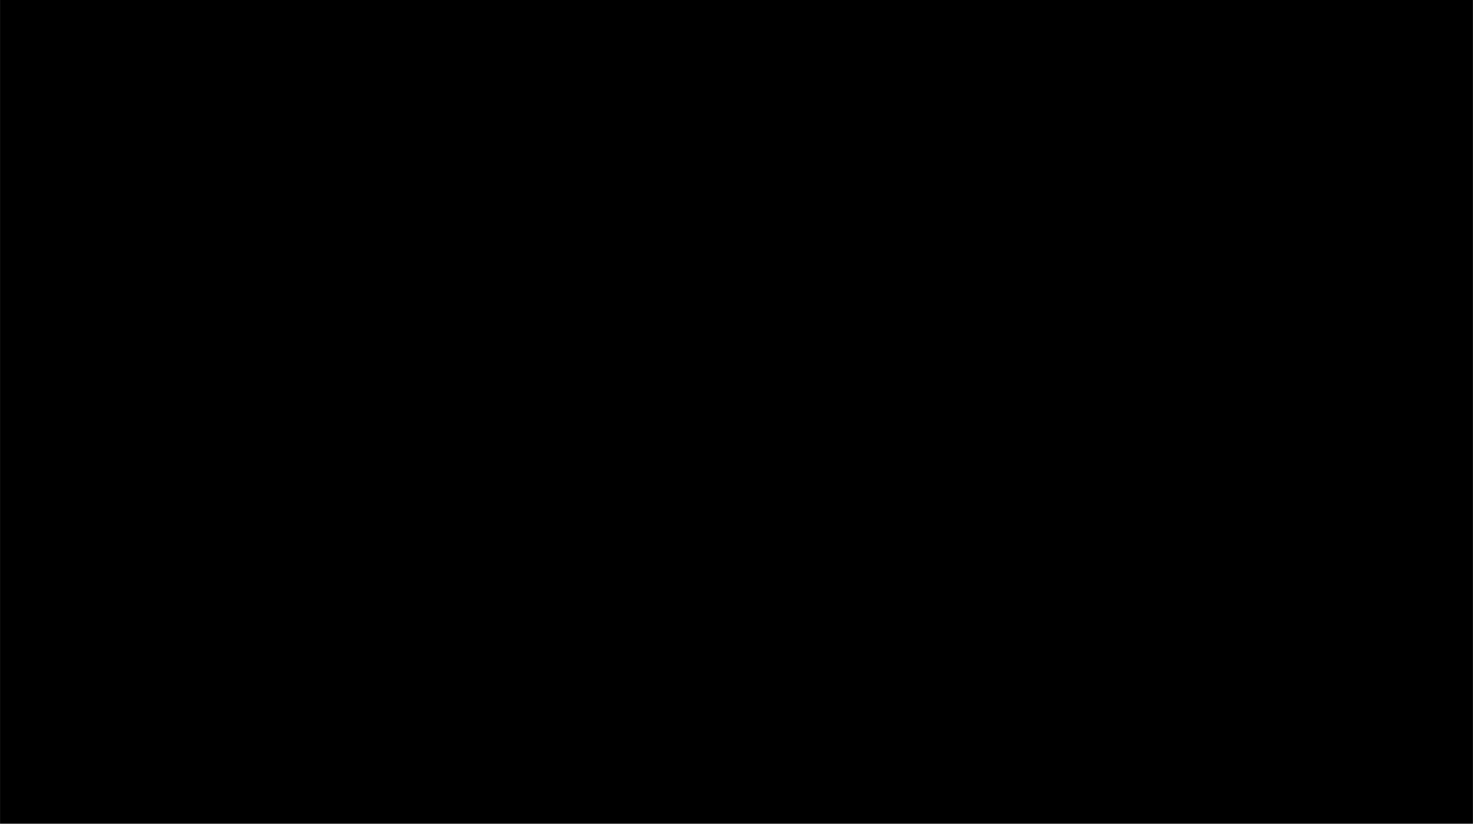

Broad emergency planning delayed because of
jurisdictional disputes as to who runs it -
now cleared by Pres. Order. War Resources
Board primary response in ec. war. planning
- sup. Office of Ec Warfare at Plan "C" stage.
Role of intel. support yet to be specifically
drawn up.

Don't intend to get into the single vulnerable
| feature - universal solvent - search
| the Ec Warfare Board
| more realistic attacks.

Ec. Warfare

Ec. Def. Intel. Com. will provide the
mechanism for coordination. Job to
complete implementation plan, now
that ^{intel.} role clear in emergency plan.
Program to incorporate new information
sources as war develops.
Censorship intercepts.

25X1B4d

FOIAb3b

OSI in Wartime - [REDACTED] (DAD for Production)

Study of foreign scientific capabilities.
Rallying point in time of war situation.
Growing coord. activity nec. with
other agencies following outbreaks.

Systems approach rather than weapons
directly essential in wartime, and
growth in application.

More quick estimates & short-term projects.
Up-date many previous estimates soon
in course of war.

Early assessments for current intell.
Closer connections with operations &
with collection (as exploitation of PW's).
Direct long-range aid to military
ops, who would themselves be occupied
by combat & tech. intel.
